

**RetroBrain R&D** has been developing therapeutically-preventive video games for healthy seniors affected by dementia, Parkinson's disease and stroke since 2014. Our 30-strong team has a clear vision: to ensure that therapy and prevention in (semi-)inpatient care can be fun. We are proud to make the world a little bit better every day with our small development team.

At the next possible date we are looking for a colleague in a permanent position as

## (Senior) 3D Artist (m/f/x)

### What we offer

- Tech Stack: Unity3D, Substance Painter, Maya, Zbrush, Jira, Confluence, Bitbucket, Git
- Agile working with Scrum
- Varied work, where you learn new technologies by working on different features
- Despite the start-up mentality we have already established workflows
- Small, enthusiastic team with a high degree of personal responsibility and the opportunity to contribute to the development of the company
- 24/7 accident insurance and a company pension plan
- Flexible working time model, mobile working, 30 days vacation, home office regulation and part-time model possible
- big office within walking distance of the main station with gaming room, coffee, tea and fruit

### Responsibilities:

- You will be responsible to go from concept to production
- You will be responsible of integrating the new 3D assets within the game engine
- You will work closely with Game Design when gathering the requirements, and with the developers, when integrating the final asset within the game
- You will have always in mind the special needs of our players when producing new content

### Required skills:

- 5+ years of working experience within a games production pipeline
- Extensive knowledge of Maya, Zbrush, Substance Painter and Unity3D
- Extensive knowledge of real-time asset production techniques
- Strong artistic as well as technical skillset
- Fluent English written and oral communication skills

### Nice to have:

- Experience in rigging and animation
- Experience with Confluence, Jira and a version control system (ideally git)
- Optimization skills for assets in resource constrained platforms

### Want to make a difference?

Then apply with your english CV to Annalena Feldmüller by e-mail at [hr@retrobrain.de](mailto:hr@retrobrain.de). If you have any questions, you can reach Annalena by phone at 0151 7464 1210.

We are looking forward to you.
